Banking

Success Story

Business Challenge

Increased regulatory and security requirements coupled with commercial and personal banking clients requiring superior service and high infrastructure costs have driven most of the small banks to be either acquired or run out-of-business.

Solution

Agile Informatics has worked with banks and other financial institutions meeting their long term objectives and goals.

Varied solution include:

- » Compliance to federal and global banking regulations
- » Dramatically reduce processing times by reengineering and/or redesigning processes
- » Superior web portals with rich functionalities customizable per client
- » Implementing lockbox file processing solutions
- » Risk management

Sectors

- » Cards
- » Check processing
- » Reconciliation
- » Retail banking
- » Investment banking
- » Wealth management
- » Corporate banking
